

First Philec

Go Lokal, Buy Local
Gawang Pilipino

First Philec is a local manufacturing company that produces electrical equipment for power distribution. They are also the pioneer and leader of transformer solutions in the Philippines, with over 250,00 installations nationwide. It has been the preferred brand to the country's power utilities, commercial, and industrial business for over five decades.

Partnership with Local Vendors

First Philec is committed to provide their customers with premium products, made out of quality materials from our suppliers. With this, FPI takes the time to review the companies they are about to start a partnership with and ensure that these suppliers can adhere to established contract terms and performance objectives.

Some of First Philec's active vendors are from the Philippines, providing them with core materials from bare tanks to adhesives. To name a few, **Cherimel Philippines Inc, Helix Steel Products Corp, Janus Manufacturing and Pioneer Adhesives.**

Job Opportunities for locals

With the recent turn of events brought upon by COVID-19, First Philec does everything they can to help their local communities recover from the pandemic, and one action that FPI has taken is providing jobs to locals.

First Philec's active job listings gives opportunity to locals who have lost their jobs and help them rebuild their career to get them back on supporting their families during these difficult times.
