

First Philec

FIRST PHILEC INC. is the pioneer and leader in transformer solutions in the Philippines. It has been the preferred solutions provider to the country's power utilities, commercial and industrial businesses for more than 45 years. The company is also the largest manufacturer of amorphous transformers in Southeast Asia.

A member of the Lopez Group, FIRST PHILEC is the intermediate holding company of First Philippine Holdings Corporation (FPH) primarily for its manufacturing and technology-related investments. Through FIRST PHILEC, FPH intends to grow its investments in manufacturing to provide a more robust backbone to the country's economy—one that is founded on technological competitiveness and increased ability to add value to products and manufacturing services for the global market. FIRST PHILEC intends to achieve its growth by building on its core strength in operations excellence. With manufacturing as our core, we aim to engineer innovative industrial solutions.

CORPORATE OFFICE ADDRESS

10F The Rockwell Business Center
Tower 3, Ortigas Avenue, Ugong,
Pasig City 1604, Metro Manila,
Philippines

PLANT ADDRESS

Second Street Extension
First Philippine Industrial Park
Brgy. Ulango Tanauan City
Batangas, Philippines

Our in-house Technical Services (TS) department is comprised of highly qualified and experienced technical personnel. Our TS team is on call to service clients' electrical preventive maintenance needs or any emergency requirements.

POWER DELIVERY (PD) EQUIPMENT SERVICES

On-site testing and repair services for all kinds of static electric apparatus

PREVENTIVE MAINTENANCE SERVICES

Transformer and oil purification

Protective relay, electric meters calibration and operational check

Location and rectification of faults in equipment and electrical circuit

Final testing and commissioning of electrical equipment

CONDITION BASED ASSESSMENT OF HIGH VOLTAGE ELECTRICAL EQUIPMENT

Diagnostic procedures are done to determine the condition of your equipment so that possible problems are addressed at the soonest time possible.

NEW POWER TRANSFORMER, SWITCH GEARS & BREAKERS

In-Service Testing and Maintenance for the following equipment:

First Private Pole and Steel Structures

Power and Distribution Transformers

Circuit Breakers [Oil, Gas (SF6), Vacuum, Air]

Switchgears, Disconnects, Switches, Reclosers

Motor Control Centers (MCC)

Lightning Arresters and Insulators

Grounding Systems

Power Cables

Instrument Transformers

Protective Relays

Metering Devices

Our in-house Technical Services (TS) department is comprised of highly qualified and experienced technical personnel. Our TS team is on call to service clients' electrical preventive maintenance needs or any emergency requirements.

ENGINEERING SERVICES

Loading Check, Load Analysis, Balancing and Distribution

Load Simulation and Protective Relay Coordination Study

Trainings and Seminars

Troubleshooting, location and rectification of faults in equipment and electrical circuits

Final testing and commissioning of any substation equipment

MAIN EQUIPMENT LIST

AC and DC Hi-potential Tester

1ph and 3ph Protective Relay Calibration Test set

Portable Transformer Test sets

Current and Potential Transformer Test Sets

Circuit Breaker Contact Resistance Tester

Insulation Power Factor Tester

Insulation Resistance Testers

Oil Dielectric Breakdown Voltage Testers

Low Resistance Measurement Devices

Ground Resistance Testers

Vacuum Oil Purifier

Vacuum Pumps

Transformer Turns Ration (TTR)
